SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Frameworks: Flask, React, Pandas

Technologies: Node.js, PostgreSQL, Docker, Cypress, AWS, Git, Microsoft Entra, REST APIs

EXPERIENCE

Eikon Therapeutics

Software Engineer II

Mar 2025 - Jul 2025

- Built an internal animated content tool and interactive preview app that cut GIF creation time by 70 percent and was adopted by all teams with 120 monthly assets created.
- Designed and co-led a 24/7 monitoring dashboard that achieved 99.95 percent uptime and lowered mean time to resolution by 40 percent.
- Optimized Docker based deployment workflows that reduced deploy time by 20 percent and lowered rollback rate by 50 percent.
- Delivered the back end for a machine learning labeling tool, adding 6 new API endpoints and an efficient storage path that supported labeling of about 2,000 images per day with annotation throughput up 60 percent.

Software Engineer I

Nov 2022 - Mar 2025

- Implemented secure user sign-on for internal applications, enabling HTTPS and Single Sign-On (SSO) with Entra and MSAL. Managed certificate configuration across development, alpha, and production environments.
- Optimized a real time experimental data monitor by adding server side caching and consolidating API calls. Reduced API volume by about 50 percent and cut initial load from about 8 seconds to about 3 seconds.
- Built and maintained Cypress end to end tests for all team owned internal APIs. Coverage grew from 0 to about 70 percent and QA found regressions fell by about 35 percent.
- Engineered advanced data customization in a React visualization app including configurable tables, saved views, and a dedicated search interface backed by SQL full text search. Reduced time to locate key datasets from about 45 seconds to about 10 seconds.

Kingston Technology

Programming Analyst

Jul 2021 - Oct 2022

- Partnered with manager to resolve about 8 to 12 bugs per sprint with a first fix pass rate near 90 percent, adding regression tests that reduced repeat incidents by 25 percent.
- Led the full lifecycle development of an internal web application that tracked and expedited malfunction escalations, contributing to process improvements within the company.
- Replatformed 3 Lotus Notes apps to a single web stack, lowering maintenance effort by about 20 percent and removing the need for Notes licenses for the team.

EDUCATION

University of California, Irvine

B.S. in Computer Science
